**VERY IMPORTANT:** Since we have a high level of customer service, we allow customers to change the color of the cart. We can apply the finish laminate color of your choice. The recommended counter finish is black.

### **Included - Sink w/ Faucet:**

Mini Double ABS Espresso Cart Sink - 3 Compartment s

Most states require a three compartment dishwashing sink. Built of ABS plastic and NSF APPROVED.

Includes strainers and stylish faucet.

### **Included - Water Pump:**

The FLOJET Bottled Water Dispensing System was designed to pump water from a commercially available 5-gallon water bottle. The system will deliver the water under pressure to your espresso machine or sink mounted individual drinking water faucet.

When the suction wand is inserted into the 5-gallon bottle, it will activate the float switch on the end of the wand and turn on the pump. This same float switch shuts off the system when the bottle is empty.

The wand has a built in back-flow preventor valve that prevents water in the system from flowing back into the bottle, or spilling while changing bottle.

### **Included – 4 Gallon Hot Water Heater**

Package Price: \$4995
